# ORGANIC COTTON

Organic cotton is cotton grown with **low environmental impact methods and products, without the use of pesticides and toxic chemical fertilizers** that persist in the cotton itself and in the environment.

It comes from controlled and certified organic crops. With this approach, **water consumption is reduced, soil fertility is maintained and better working and health conditions for farmers are guaranteed.**

After an intensified control of our entire production chain, we can confirm we have no direct business relationships with any manufacturer in **Xinjiang**, the native region of Uyghurs in western China and we are taking significant steps to ensure that there is no indirect involvement of Xinjiang labor in the manufacturing of our products.

**91%**  
OF **WATER**  
FROM IRRIGATION

**62%**  
OF **ENERGY** FROM PRODUCTION  
OF FERTILIZER

**46%**  
OF **CO<sub>2</sub>** EMISSIONS  
FROM PRODUCTION
